

# PBS Authorities – Changes to Hereditary angioedema

We understand having access to PBS-subsidised medicines can be critical to patient care. That's why Services Australia and the Department of Health and Aged Care are continuing to work together to increase the number of PBS medicines that can be requested and approved in 'real-time' using the Online PBS Authorities system (the system). This will include lanadelumab for hereditary angioedema without cataplexy from 1 August 2024.

These changes will make it easier for you to request authority approval for these medicines from Services Australia. You will no longer need to submit written authority applications, details of the proposed prescriptions and test results for certain medicines and treatment phases. Instead, you will be able to use the system to apply for authority approval and provide evidence digitally.

## Summary of changes from 1 August 2024

Medicines	Authority Level	Details of Changes
<b>Hereditary angioedema</b>		
lanadelumab	<b>Online / Written:</b> <i>Initial treatment</i>  	Adding an online channel to the existing written channel for an immediate assessment result for your patient.
	<b>Online / Telephone:</b> <i>Continuing treatment</i>  	No change to continuing Authority Required restriction. Authority applications can be made in real-time using the Online PBS Authorities system or by telephone.
 Request authority online – Immediate Assessment		 Request authority by telephone
 Upload form via HPOS or post		

If you're submitting the authority application form via post or Health Professional Online Service (HPOS) form upload facility, you'll still need to submit authority applications, details of the proposed prescriptions and test result details. This will delay the assessment of the authority application.

## Changes to the PBS Authority prescription process from 1 July 2024

As of 1 July 2024, Services Australia no longer accepts original prescriptions. We only accept details of the proposed PBS prescription (and PDF form where appropriate) when seeking PBS authority approval via the post. We won't record the Authority Approval Number on the prescription or forward approved prescriptions to the patient. Where applicable, please ensure you keep a copy of the written authority application form and provide only copies of pathology results.

It's important to note, any original prescriptions Services Australia receives via the post that are written after 1 July 2024 will be immediately returned to you. Services Australia will retain a copy of the prescription for processing.

Once processed, the assessment outcome will be sent to you via the post. If approved, you will need to endorse the original PBS authority prescription with the PBS Approval Number and PBS item code prior to providing to your patient with a completed authority prescription.

We're also updating PBS Authority prescription pads, the 'Tick for return to patient' checkbox will be removed. You can continue to use your residual stock as it will still be valid. Changes have also enabled an increase to the number of sheets per prescription pad, from 25 to 50 sheets. This will mean you can reduce the number of pads you will need to order each time.
