

RE: AVAILABILITY OF LUMACINA SODIUM CHLORIDE 10ML (50)

Dear Healthcare Professional,

We write to advise that there is a current supply constraint related to the **LumaCina Sodium Chloride 10ml (50)** product. The shortage is due to an unanticipated manufacturing delay, coupled with an increase in demand for this product.

We estimate that the shortage will persist until June 2024; however, steps are being taken to stabilise supply of this product as a critical priority by all parties concerned.

Via consultation with alternate suppliers, it has been determined that no alternate supplier is able to support the monthly usage requirements of the LumaCina product in real-time. Juno is collaborating with alternate suppliers to access the limited inventory that is available in a substitute capacity and exploring Section 19A supply opportunities in parallel to promote access.

Alternate LumaCina presentations, 5ml and 20ml, are available to supply. It is important to note that there is insufficient inventory to support wholesale conversion from 10ml for the duration of the shortage.

ITEM NO	DESCRIPTION	PACK	GTIN	SYMBION	CH2
F000158594	Sodium Chloride 0.9% Steriluer 10 mL 50	50	9313212105885	110310	2037149

ITEM NO	DESCRIPTION	PACK	GTIN	SYMBION	CH2
F000116933	Sodium Chloride 0.9% Steriluer 5mL 50	50	9316795000745	63959	1242908
F000116935	Sodium Chloride 0.9% Steriamp 20mL 30	30	9316795000417	273376	2341274

We shall communicate again once the confirmation on resupply timeline for Sodium Chloride 10ml is available.

We apologise for any inconvenience caused due to this supply interruption and your understanding on this matter is much appreciated.

Regards,
