

PBS Authorities – Changes to severe asthma program

We understand having access to PBS-subsidised medicines can be critical to patient care. That's why Services Australia and the Department of Health and Aged Care are continuing to work together to increase the number of PBS medicines that can be requested and approved using the Online PBS Authorities system (the system). This will include benralizumab, dupilumab, mepolizumab, and omalizumab for the treatment of severe asthma from 1 February 2025.

These changes will make it easier for you to request authority approval for these medicines from Services Australia. You will no longer need to submit written authority applications, details of the proposed prescriptions and test results for certain medicines and treatment phases. Instead, you will be able to use the system to apply for authority approval and provide evidence digitally.
