

POLATUZUMAB VEDOTIN

BRAND NAME	POLIVY												
DRUG CLASS	Cytotoxic cancer therapy, monoclonal antibody (humanised) and antimitotic agent												
AVAILABILITY	Vial contains 30 mg or 140 mg of polatuzumab vedotin. ¹ Also contains succinic acid, sodium hydroxide, sucrose and polysorbate-20. ¹												
WARNING	Cytotoxic. ¹ Strict handling precautions are required. Check your local guidelines for handling of cytotoxic medicines and related waste.												
pH	5.3 when reconstituted ²												
PREPARATION	<p>In a cytotoxic drug safety cabinet:</p> <p>Reconstitute the 30 mg with 1.8 mL or the 140 mg vial with 7.2 mL of water for injections, directed down the wall of the vial. Swirl gently until dissolved. Do not shake. The concentration is 20 mg/mL.</p> <p>The solution is clear to slightly opalescent and colourless to light brown.¹</p> <p>Dilute the dose in a minimum of 50 mL of a compatible fluid. The final concentration should be 0.72–2.7 mg/mL. Mix by gently inverting the bag. Do not shake.¹</p> <p>Excessive agitation of the solution can cause aggregation. If the solution must be transported, see the product information for further instructions and stability information.¹</p>												
STABILITY	<p>Vial: store at 2 to 8 °C. Do not freeze. Protect from light.¹</p> <p>When prepared by pharmacy under aseptic conditions:</p> <p>Reconstituted solution: stable for 20 hours below 25 °C and 72 hours at 2 to 8 °C.¹</p> <p>Infusion solution¹:</p> <table><tr><th>Fluid used</th><th>Below 25 °C</th><th>At 2 to 8 °C</th></tr><tr><td>Glucose 5%</td><td>8 hours</td><td>72 hours</td></tr><tr><td>Sodium chloride 0.45%</td><td>4 hours</td><td>36 hours</td></tr><tr><td>Sodium chloride 0.9%</td><td>4 hours</td><td>72 hours</td></tr></table>	Fluid used	Below 25 °C	At 2 to 8 °C	Glucose 5%	8 hours	72 hours	Sodium chloride 0.45%	4 hours	36 hours	Sodium chloride 0.9%	4 hours	72 hours
Fluid used	Below 25 °C	At 2 to 8 °C											
Glucose 5%	8 hours	72 hours											
Sodium chloride 0.45%	4 hours	36 hours											
Sodium chloride 0.9%	4 hours	72 hours											
ADMINISTRATION													
IM injection	Not recommended												
SUBCUT injection	Not recommended												
IV injection	Not recommended ¹												
IV infusion	Infuse the first dose over 90 minutes. If well-tolerated subsequent infusions can be given over 30 minutes. ¹ Use a low protein-binding 0.2 or 0.22 micrometre filter. ¹												
COMPATIBILITY	Sodium chloride 0.9% ¹ , sodium chloride 0.45% ¹ , glucose 5% ¹												
INCOMPATIBILITY	No information												
SPECIAL NOTES	<p>Premedication with an antihistamine and paracetamol is recommended.¹</p> <p>Monitor for infusion reactions during the infusion and for 90 minutes after the first infusion, and 30 minutes after subsequent infusions.¹</p> <p>Dizziness after the infusion is very common.¹</p> <p>Minimal emetogenic risk.³ Check your local guidelines for premedication requirements</p>
